

GAFFGUN[™]

The Fastest & Easiest Way to Lay Tape

The PROTEX[®] GaffGun[™] Contractor Bundle[™] was specifically designed for the rigors of the construction industry with a waterproof, industrial hard shell case with custom molded foam inserts that protects your GaffGun and accessories in just about any environment.

The GaffGun is a revolutionary multi-purpose floor tape applicator tool that makes your most difficult floor tape jobs faster, cleaner and safer.

Manually installing temporary floor protection seam tape is tedious, time-consuming and painful. Yet, the high costs of repairing surface damages makes it a necessity so you might as well make it as simple a process as possible.

GaffGun's patent-pending design is as easy to use as walking and cuts seam tape application time by up to 90%.

Since construction projects have multiple taping needs throughout the construction process, the GaffGun[™] was designed to work with practically any type of tape.

The GaffGun[™] has a tension controlled CoreLok[™] hub that automatically keeps tape rolls centered to effortlessly lay tape over cables, extension cords, rope or even air hoses.

In fact, they don't even have to be straight as the GaffGun's unique funneling system automatically straightens and centers the cables before laying tape over them.

Easy to Use, Durable, Patent-Pending & Made In USA.
